Accelerate your career through Co-op

Paid work placements prepare students for future employment through our Co-operative education model (Co-op). Studying a Co-op course means you'll complete paid work experience during your course, making you feel more confident for employment. With flexible options to complete your placement, we will arrange the placement for you through our network of industry partners.

Since Co-op is part of your degree, you can keep working in your casual or part-time job while on placement (your student visa allowable working hours will not be impacted).
